Johnny Ermio

I'm a Full Stack Web Developer with strong experience in Laravel, Inertia.js, and Vue.js, focused on building dynamic, user-friendly, and scalable web apps. I excel in both front-end and back-end development, solving complex problems, optimizing performance, and delivering elegant designs. Additionally, I have a solid background in computer system servicing, including hardware troubleshooting, network setup, and system maintenance, ensuring smooth and efficient technology operations.

Work Experience

Freelance Developer · Self-Employed

January 2022 - Present
- Developed custom academic projects and capstone solutions, specializing in full-stack development.
- Collaborated with students to transform project ideas into functional applications.
- Delivered projects on tight deadlines, focusing on clean code and maintainable solutions.

Split Second Software Services · Internship

Mar 2024 - July 2024
- Developed dynamic, feature-rich web applications using Laravel for backend operations and Vue.js for front-end interfaces, ensuring seamless user experiences.
- Built reusable Vue components and implemented efficient state management with Vuex, following best practices for maintainable and modular code.
- Enhanced UI elements and interactivity using Vue transitions, Tailwind CSS, and third-party libraries to provide a polished user interface.

Barangay Tongantongan Health Center · IT Support

Mar 2022 - Mar 2023
- Provided IT support for a barangay health center, addressing and resolving software, hardware, and network issues for staff and facilities. Ensured smooth operations to support critical health services.
